COMPETENCES

- Teamwork.
- Information search.
- Planification and organization.

Miguel
Castillo

Multimedia Engineer

PROFESSIONAL PROFILE

Development of user interfaces:
I use my knowledge of HTML, CSS and JavaScript to create attractive and visually stunning user interfaces. I have a strong focus on aesthetics, usability, and user experience, ensuring that my web applications are intuitive and enjoyable to use.
Design implementation and layout: I can carry out the technical implementation of designs provided by graphic designers or design teams, turning them into functional web interfaces. I work with precision in the layout and positioning of elements using frameworks and tools such as Bootstrap or Flexbox.

Adaptability and responsive design:
I have experience in creating websites and applications that adapt to different devices and screen sizes. I implement responsive design to ensure a consistent experience across desktop, tablets, and mobile devices.

Collaboration in multidisciplinary teams:
I am used to working in multidisciplinary teams, collaborating closely with designers, back-end developers and other professionals to achieve exceptional results. I have effective communication skills and the ability to understand and translate design and technical requirements into functional code.
